Manager

Field Fertilization Notice

Town of Hanover fields will be fertilized between April 11th and April 15th. Some fields will receive limited herbicide treatments. Residents are advised not to use the fields immediately after treatment for two days. The schedule of treatments and when each field is safe to return to play is as follows:

Forge Pond Park – Fertilized Thursday, April 11th. Safe to return Saturday, April 13th.

Gallant, Brigg's, Myrtle, Ellis, Salmond – Fertilized Friday, April 12th. Safe to return Sunday, April 14th.

School Fields (Center School, Sylvester School, Cedar School, Middle School, High School) – Fertilized Monday, April 15th. Safe to return Wednesday, April 17th.

We understand that residents would like to use the facilities during the school vacation week and apologize for the closure of the facilities. The DPW has coordinated the scheduling of this work to minimize potential exposure of students and personnel to fertilization materials while schools are in session. Organized athletic leagues that routinely use the Town's fields have been notified of our plans and should be adjusting their schedules accordingly. We apologize for any inconvenience but this is a necessary maintenance function in order to maintain the health of the facilities.
